Contents

Short Communications

Case study of guided wave propagation in a one-side water-immersed steel plate L. Yu and Z. Tian	1
Characterization of planar flaws by synthetic focusing of sound beam using linear arrays P. Nanekar, A. Kumar and T. Jayakumar	9
Measurement of working coil temperature in electromagnetic forming processes by means of optical frequency domain reflectometry S. Gies, A. Langolf, C. Weddeling and A.E. Tekkaya	15
X-ray computed tomography of a titanium aerospace investment casting A. du Plessis and P. Rossouw	21
Evaluating asphalt concrete air void variation via GPR antenna array data K. Hoegh, L. Khazanovich, S. Dai and T. Yu	27
Fibre structure characterisation of injection moulded short fibre-reinforced polymers by X-ray scatter dark field tomography C. Hanneschläger, V. Revol, B. Plank, D. Salaberger and J. Kastner	34
